

Matrix instead of silo: Workshop on work organization

We analyze the effects of AI and draw conclusions for work organization.

[Find out more](#)

Opportunities for the productivity of your company

What impact does AI have on companies and the organization of work? The thesis: AI tools will soon be at least as good as humans in areas such as programming and image creation. This will reduce the need for specialists and creative generalists will be in demand. Traditional departments will no longer suffice. **In the future, cross-functional teams will be needed to develop solutions together.**

What we look at

In this workshop, we will give you an insight into the impact of AI on the world of work and show you how you can **actively shape these changes**. From the definition of AI to existing working models and adaptation to your organization. We will explore the future of work organization with you and develop strategies for successful working in the AI age.

Workshop objectives

After the workshop, you will be able to assess the opportunities and risks of AI and derive appropriate measures for your work organization. Concrete strategies will help you to make your work environment fit for the future.

Focus of the workshop:

- Classification & potential
- Impact of AI on the world of work
- Evaluation of alternative work organizations
- Conclusions for your company
- Action plan for implementation

Key data

- In-house workshop
- Tailored to your company
- Duration: full day, 10 a.m.–5 p.m., with discussion of results
